# clima comfort

Most people know it, tired in the morning due to freezing or sweating in the night. As well in summer as in winter times uncomfortable temperatures cause discomfort. This has a negative impact on the sleep duration, but also on the sleep quality. The result you feel fatigue and miss the power for the day.

**Clima comfort** fabrics from STS Textiles offer you best sleeping climate after short time. These fabrics have a high tech finish for brilliant temperature comfort.

The results of using **clima comfort** fabrics are:

- perfect individual temperature in your bed
- less sweating and freezing in your bed
- better sleep
- temperature balance
- Ökotex Standard 1 – class 1
