effective by nature

The innovative **WOOD WORKS!**<sup>®</sup> - finish is a natural, on biological protection mechanism of trees based finish for textiles.

The exclusive of STS Textiles developed and produced finish offers protection against bacteria and mildew, without using harmful chemicals. The **WOOD WORKS!**<sup>®</sup>- finish of STS Textiles works based on 100% natural wood enzymes of the pinus sylvestris.

The wood which is used for the production of

the enzymes was planted in PEFC-certified forestry. STS Textiles **WOOD WORKS!**<sup>®</sup>- finish achieves very good results in laboratory tests, which have proven, that the finish can reduce the growth of microorganisms strikingly. The finish is especially interesting for the field of sleep textiles due to longer cleaning circles.

The **WOOD WORKS!**<sup>®</sup> of STS Textiles offers the following advantages:

- natural protection against bacteria and mildew
- non – allergic
- no developing of resistance known
- long lasting impact
- natural smell
