

Zirbe®

from nature soothing

The swiss pine is a special plant. It's growing in heights which are higher than 1400m above sea level and with that it's a very special and resistant tree. The swiss pine has a very high concentration of wood ingredients and with that it has a very pleasant and natural smell.

STS Textiles is the first manufacturer, who is able to combine the positive characteristics of the swiss pine tree in a textile fabric, the result is the pine-fabric of STS Textiles.

Swiss pine fabrics of STS Textiles are equipped with natural enzymes of the pine

tree, which has been growing in sustainable PEFC-certified forestry. The enzymes which are tied in the swiss pine wood have the ability, to calm down the human organism and to reduce the heartbeat actively. Result of the reduced heartbeat rate is a deeper sleep and along with that a higher performance during day times. Swiss pine fabrics of STS Textiles have provably the ability to limit the bacteria and mildew growth on the fabric.

Swiss pine fabrics of STS Textiles have the advantage:

- it supports the general well being
- calming down the human organism
- enable a deeper sleep
- pleasant smell
- limit the growth of bacteria
- limit the growth of mildew
